ASHP Practice Advancement Initiative (PAI) 2030: Utilizing Pharmacy Technicians in Advanced Roles

Anne Policastri, PharmD, MBA, FASHP, FKSHP
Director, ASHP Affiliate Relations
Disclosures

No one in control of the content of this activity has a relevant financial relationship (RFR) with an ineligible company.

No off-label uses of medications will be discussed.
Learning Objectives (P/T)

- Summarize key recommendations of the ASHP PAI 2030 Initiative.
- Identify strategies to develop a statewide effort for recommendations focused on technician advancement.
- Describe opportunities to monitor the PAI 2030 focused initiative “Expand the role of pharmacy technicians.”
- List strategies to close identified gaps and create opportunities to utilize pharmacy technicians in advanced roles.
“If you don’t know where you’re going, you’ll end up someplace else.”

Yogi Berra
Mirror to Hospital Pharmacy
- ASHP received funding for the first comprehensive, national audit of pharmacy services in hospitals

Pharmacy in the 21st Century Conference
- Examined major issues and trends expected to confront the profession during the next 15-20 years

Directions for Clinical Practice in Pharmacy (Hilton Head Conference)
- Promulgated the idea that hospital pharmacies should function as clinical departments with the mission of fostering the appropriate use of medicines.

ASHP Conference on Implementing Pharmaceutical Care
- Focused on how to expand pharmaceutical care beyond pilot programs; called for personal commitment of pharmacy staff to advance pharmaceutical care

ASHP Health-System Pharmacy 2015 Initiative
- Provided a framework to significantly improve the practice of pharmacy in hospitals and health systems.

Pharmacy Practice Model Summit
- Developed 147 consensus recommendations for practice focused primarily on hospital settings.

Ambulatory Care Summit
- Developed 25 ambulatory care-specific recommendations for practice advancement

Practice Advancement Initiative 2030
- Provides pharmacy teams with guidance for advancing healthcare, patient outcomes, and pharmacy practice through 59 recommendations.

Practice Advancement Initiative 2020
- Provides pharmacy teams with guidance for advancing healthcare, patient outcomes, and pharmacy practice through 59 recommendations.

The ASHP Practice Advancement Initiative (PAI) 2030 includes 59 recommendations to promote optimal, safe, and effective medication use; expand pharmacist and technician roles; and implement the latest technologies.

Learn more about PAI 2030 at ASHP.ORG/PAI
Subdomains of PAI 2030 Recommendations
(Example: Pharmacist Role, Education, and Training Domain)

B1. All pharmacists should have an individualized continuing professional development plan.

B2. Pharmacists should leverage and expand their scope of practice, including prescribing, to optimize patient care.

B5. Pharmacists should participate in organization-based credentialing and privileging processes to ensure competency within their scope of practice.

B6. Pharmacy practice leaders should ensure that their workforce has the necessary knowledge and competency to adapt to emerging healthcare needs.

B12. Credentialed ambulatory-care pharmacists should be considered primary care providers.

B13. The profession should champion multi-state or national licensure for pharmacists.
Patient-Centered Care

Practice

A5. Work as part of interprofessional care teams.

Organization

A8. Patient centered care across the continuum of care.

Profession

A14. Pharmacists should lead and advocate for comprehensive medication management in all healthcare settings.
Pharmacist Role, Education, & Training

Practice

B2. Pharmacists should expand scope of practice to include prescribing to optimize patient care.

Organization

B6. Pharmacy practice leaders should ensure their workforce has the necessary knowledge and competency to adapt to emerging health care needs.

Profession

B9. Pharmacists in all care settings should be included as integral members of the health care team and share accountability for patient outcomes and population health.
Technology & Data Science

Practice

C2. Foster the development and application of advanced analytics.

C3. Assess emerging technologies.

Organization

C5. Virtual pharmacy services should be deployed.

C7. Apply analytics to financial and clinical performances.

Profession

C9. Employ high-reliability principles when designing and selecting health information technology.
Pharmacy Technician Role, Education, & Training

Practice
D1. Technicians should participate in advanced roles in a practice settings to promote efficiency and improve access to patient care.

D2. Technicians should have complete responsibility for advanced technical and supporting activities.

Organization
D5. Foster the development of professional career paths for pharmacy technicians.

Profession
D6. Define scope of practice.
Leadership in Medication Use & Safety

**Practice**

E1. Advance the use of pharmacogenomics.

E2. Assume leadership roles in medication stewardship at local, state, and national levels.

**Organization**

E4. Ensure evidence-based medication use.

E7. Strive to achieve equity, diversity, and inclusion in all technical, clinical, and leadership roles.

**Profession**

E12. Leaders in policy development.

WHAT IS PAI 2030?

59 recommendations on providing optimal, safe, and effective medication use

Aspirational guidance serving as a roadmap to pharmacy practice advancement

Future-focused set of concepts looking beyond today's barriers to change

Some themes associated with PAI 2030 recommendations include:

A. Optimize care via pharmacist-provided comprehensive medication management
B. Increase in the credentialing and privileging of pharmacists in health-systems
C. Advance pharmacy technician roles to improve patient care access
D. All of the Above
Some themes associated with PAI 2030 recommendations include:

- Optimize care via pharmacist-provided comprehensive medication management
- Increase in the credentialing and privileging of pharmacists in health-systems
- Advance pharmacy technician roles to improve patient care access
- All of the above
Self-Assessment Check-In

Some themes associated with PAI 2030 recommendations include:

A. Optimize care via pharmacist-provided comprehensive medication management
B. Increase in the credentialing and privileging of pharmacists in health-systems
C. Advance pharmacy technician roles to improve patient care access
D. All of the Above
### Patient-Centered Care
- Shift from patient advocacy to patient and family activation
- Integrate pharmacy enterprise for convenient and cost-effective care
- Optimize care via pharmacist-provided comprehensive medication management

### Pharmacist Role, Education, and Training
- Increase in the credentialing and privileging of pharmacists in health systems
- Proliferation of board certification in many practice areas
- Building of workforce skills in population health management and mental/behavioral health

### Technology and Data Science
- Harness data analytics to improve patient health
- Augmented intelligence is an important developing technology that will impact operations and practice
- Assessing patient care technologies to support optimal medication-use outcomes

### Pharmacy Technician Role, Education, and Training
- Foster development of professional career paths for pharmacy technicians
- Achieve a recognized scope of practice
- Advance pharmacy technician roles to improve patient care access

### Leadership in Medication Use and Safety
- Advance use of pharmacogenomics information and lead medication stewardship activities
- Increase public health opportunities to address social determinants, chronic illness, and addiction
- Support the well-being and resiliency of pharmacy workforce

ASHP PAI 2030: Focused Initiatives
PAI 2030 Focused Initiatives

**FI 1: Optimize medication-use and access through pharmacist prescribing.**

**Objective:**
By 2024, increase authority for pharmacists to independently prescribe medications, pursuant to a diagnosis, by 20%.

**FI 2: Leverage and utilize technology to optimize pharmacist provision of care to patients.**

**Objective:**
By 2024, increase by 20% the number of health systems using analytics and technology to reduce the risk of adverse drug events or suboptimal outcomes.

PAI 2030 Focused Initiatives

**FI 3:** Ensure all patients receive seamless and coordinated pharmacy services at all transitions of care.

**Objective:**
By the end of 2024, increase the number of health systems with integrated pharmacy services to coordinate effective patient care transitions by 20%.

**FI 4:** Improve patient access to pharmacist services in ambulatory care clinics.

**Objective:**
By the end of 2024, increase the number of pharmacists in ambulatory care clinics by 20%.

PAI 2030 Focused Initiatives

**FI 1:** Optimize medication-use and access through pharmacist prescribing.

*Objective:*

By 2024, increase authority for pharmacists to independently prescribe medications, pursuant to a diagnosis, by 20%.

**FI 2:** Leverage and utilize technology to optimize pharmacist provision of care to patients.

*Objective:*

By 2024, increase by 20% the number of health systems using analytics and technology to reduce the risk of adverse drug events or suboptimal outcomes.
FI 3: Ensure all patients receive seamless and coordinated pharmacy services at all transitions of care.

Objective:
By the end of 2024, increase the number of health systems with integrated pharmacy services to coordinate effective patient care transitions by 20%.

FI 4: Improve patient access to pharmacist services in ambulatory care clinics.

Objective:
By the end of 2024, increase the number of pharmacists in ambulatory care clinics by 20%.
FI 5: Expand role of pharmacy technicians.

Objective:
By 2024, increase the number of health systems utilizing pharmacy technicians in advanced roles by 20%.
Pause for Reflection

Reflecting on the PAI 2030 recommendations, how will you identify the greatest opportunities for the profession to improve patient care outcomes and advance practice in Utah?
Reflecting on the PAI 2030 recommendations, how will you identify the greatest opportunities for the profession to improve patient care outcomes and advance practice in Utah?
Audience Discussion - Advancing the Role of Pharmacy Technicians

- What are effective strategies for recruiting, retaining, and recognizing pharmacy technicians taking on new or additional roles to build a larger connection to the mission/purpose of the organization?
- What should be reinforced, modified, communicated or added to recognize advanced level competency and value to health systems?
- How should barriers to pharmacy technician education and training should be identified and mitigated?

How to get started with PAI 2030

1. Identify a PAI 2030 champion: Identify a “lead” and build a team or task force to lead the initiative within your state affiliate or organization. Consider whom to involve on this team: experienced member(s) from legacy PAI work (e.g., PPMR, Ambulatory Care), leaders of health systems large and small, residents, and student pharmacists. A dedicated group of leaders helps ensure your PAI 2030 efforts stay on track.

2. Utilize the “PAI 2030 State Affiliate Toolkit” to plan your efforts. This provides a roadmap for leading your state through the PAI 2030, with a timeline for meetings, sample agendas, and sample communications you can customize to your state.

3. Communicate the why. ASHP’s PAI 2030 initiative began in 2020 to drive pharmacy practice change at a local level. Building on this foundation, PAI 2030 includes 55 recommendations to ensure the pharmacy profession meets the demands of future practice and patient care delivery models. The revised set of concepts are aspirational rather than prescriptive so practitioners can customize implementation plans for their institutional needs.

PAI 2030 Implementation Checklist

- Identify a PAI 2030 champion and create a PAI 2030 State Leadership Team/Task Force
- Announce creation of the Leadership Team to state affiliate members
- Read the PAI 2030 report and review the recommendations
- Review the PAI 2030 Self-Assessment Tool questions. PDF versions of organization and practitioner tracks are available within the PAI 2030 State Affiliate Toolkit
- Complete the PAI 2030 Self-Assessment Tool and corresponding “Action Plan”
- Convene a meeting of the State PAI 2030 Leadership Team
- Develop a PAI 2030 Self-Assessment Tool dissemination plan and completion goal
- Compile a list of hospital pharmacy leaders and contact information
- Email self-assessment link with request for completion through an email communication
PAI 2030 Implementation Pathway

- **Identify**
  - **Building team** (champion identification, orientation, tutorial)
  - **Prepare to launch** (state affiliate marketing, communication campaign)

- **Involve**
  - **Assess current practice** (completion of PAI 2030 Self-Assessment Tool)
  - **Create an action plan** (assignment of feasibility and impact)
  - **Take steps to improve practice** (goal & objective setting, develop plans of action, indicators of progress)

- **Influence**
  - **Monitor progress** (complete reassessments, sharing results, PAI 2030 focused initiative progress)
  - **Tell the story** (case study, podcast, webinar, manuscript submission, playbook)
PAI 2030 State Affiliate Champion/Task Group

- Promote the PAI 2030 initiative
  - Engage in conversation with colleagues and leaders
  - Bring the initiative to your Affiliate meetings and discussions
  - Encourage completion of the PAI 2030 Self-Assessment Tool
  - Extend reach to rural and medically underserved areas
  - Partner with residents and student pharmacists (e.g., SSHP chapters)

- Strategic planning, develop plans of action, focused initiatives
- Avoid tackling everything – focus on a few goals/initiatives
- Tie in with state advocacy, education, and resources based on gaps and priorities identified
PAI 2030 State Affiliate Champion/Task Group

- Compile, monitor, and distribute results
- Report on progress
- Sharing stories of success and resources (e.g., case studies, podcasts, webinars, AJHP publication, playbook, education/poster session proposals)
- Identify areas where ASHP can help
How can ASHP help?

- Advocacy and messaging
- Channeling engagement through ASHP Sections and Forums
- Help creating podcasts and webinars
- Education
- Professional policy needs (ASHP Councils)
PAI 2030 State Affiliate Champion/Task Group

- **Deliverables:**
  - Achieve a target statewide completion rate of ≥ 50% using the PAI 2030 Self-Assessment Tool
  - Create a statewide PAI 2030 action plan
  - Incorporate elements of action plan in statewide strategic plan
  - Submit a publication, tool/resource, and/or a presentation to highlight PAI 2030 successes
  - Identify at least one PAI 2030 focused initiative to pursue and monitor as a priority as part of statewide action plan
  - Highlight PAI 2030 efforts in ASHP Affiliate Annual Review Report
PAI 2030 Implementation Pathway

- **Identify**
  - *Building team* (champion identification, orientation, tutorial)
  - *Prepare to launch* (state affiliate marketing, communication campaign)

- **Involve**
  - *Assess current practice* (completion of PAI 2030 Self-Assessment Tool)
  - *Create an action plan* (assignment of feasibility and impact)
  - *Take steps to improve practice* (goal & objective setting, develop plans of action, indicators of progress)

- **Influence**
  - *Monitor progress* (complete reassessments, sharing results, PAI 2030 focused initiative progress)
  - *Tell the story* (case study, podcast, webinar, manuscript submission, playbook)
Assessing Current Practice

- Achieve statewide completion rate of ≥ XX% within XX months using the PAI 2030 Self-Assessment Tool
- Focus on completion of “organization” self-assessment track
- Complete one “official” self-assessment for each organization/practice site
- Engage learners in process, partner with SSHPs
- Self-assessment tutorial available on ASHP PAI 2030 State Affiliate Toolkit
PAI 2030 Self-Assessment Tool

Overview
ASHP's Practice Advancement Initiative 2030 (PAI 2030) provides pharmacy teams with guidance for advancing healthcare, patient outcomes, and pharmacy practice through 59 recommendations.

The PAI 2030 Self-Assessment Tool is designed to help you determine how well your practice setting aligns with the PAI 2030 recommendations. The tool identifies areas where the PAI 2030 recommendations could have the biggest impact on your practice setting.

The survey format is applicable to both institutional and ambulatory care pharmacy practice settings. Participants can complete the assessment, which takes about 45 minutes, from the perspective of a single practitioner or as an organization. The results will identify several areas for improvement. From there, a list of priorities for implementing change can be developed.

Please note that this assessment tool does NOT assist with therapeutic decision-making.

Tiered Scoring by Domain & Action Plan

ASHP Podcast: Using the ASHP Practice Advancement Initiative (PAI) 2030 Self-Assessment Tool to Influence Practice Transformation

ACCESS TO SELF-ASSESSMENT TOOL:
https://pai2030tool.ashp.org/
Assignment of feasibility and impact to lowest scoring items from self-assessment tool

**Recommendation C1**
In my organization, pharmacists use of health information technologies to advance their role in patient care and population health is:

- Improve the usefulness and availability of health information technologies that advance the pharmacist’s role in patient care and population health.

**Recommendation D2**
In my organization pharmacy technicians are completely responsible for the following advanced technical and supporting activities (Check all answers that apply):

- Make pharmacy technicians completely responsible for sterile processes training and testing.
Summary & Action Plan

Action Plan

The items below are listed in highest to lowest priority. Please return in 6-12 months and repeat this assessment and get an updated Action Plan.

Recommendation D2: Pharmacy technicians should have complete responsibility for advanced technical and supporting activities (e.g., order fulfillment, tech-check, regulatory compliance, supply chain management, diversion prevention, revenue cycle management, patient assistance programs).

Make pharmacy technicians completely responsible for supply chain management.

Take Steps to Improve Practice

- Define specific practice advancement goals & objectives
- Develop plans of action based on “Action Plan” priorities
- Identify indicator(s) of progress to pursue and monitor
  - Identify at least one PAI 2030 focused initiative to pursue and monitor as a part of statewide action plan
- Seek research or demonstration grants in support of practice advancement goals (e.g., ASHP Foundation funded offerings)
- Next steps (e.g., assign project work, forum planning, educational content)
Action Plan Trends Report (Organization - Official) (1 of 2)

- **Recommendation A2.** Pharmacist interns and/or student pharmacists engage as leaders in medication reconciliation processes during care transitions: *Discharged from an inpatient ward*

- **Recommendation A2.** Pharmacist interns and/or student pharmacists engage in medication reconciliation processes during care transitions: *Admitted to an inpatient ward*

- **Recommendation A2.** Pharmacy workforce (pharmacists, pharmacy technicians) leads medication reconciliation processes during care transitions: *Discharged from an inpatient ward*

- **Recommendation A2.** Pharmacist interns and/or student pharmacists engage in medication reconciliation processes during care transitions: *Discharged from an inpatient ward*

- **Recommendation A2.** Pharmacist interns and/or student pharmacists engage as leaders in medication reconciliation processes during care transitions: *In the emergency department*

N = 125 as of 9/8/2022
Recommendation A4. Make documentation made by pharmacists related to patient care available to: *Community pharmacies or other external pharmacy service providers*

Recommendation D3. Increase the number of newly hired pharmacy technicians who have completed an ASHP/ACPE-accredited technician education and training program

Recommendation D2. Pharmacy technicians should have complete responsibility for advanced technical and supporting activities: *completely responsible for sterile processes training and testing*

Recommendation A2. Pharmacy workforce (pharmacists, pharmacy technicians) leads medication reconciliation processes during care transitions: *In the emergency department*

Recommendation A2. Pharmacy workforce (pharmacists, pharmacy technicians) leads medication reconciliation processes during care transitions: *Admitted to an inpatient ward*

N = 125 as of 9/8/2022
